

## Ten different programming languages and their uses

### I – Communication practice

With your partners, prepare a short presentation of one of the following languages.

1. *Python*
2. *Java*
3. *JavaScript*
4. *Ruby*
5. *C*
6. *C#*
7. *C++*
8. *PHP*
9. *Swift*
10. *Go*

Each one of you will type and present **one or two slides** about **one of the topics** below:

- a **short history** of the language (date of birth, creators, main purpose...),
- its **main characteristics**,
- the basics elements of its **syntax**, and in particular, how to code a “Hello, World!” program,
- the fields of **application** of this language and, if possible, some **emblematic software** coded with it.
